The Hashemite Kingdom of Jordan

Press Release
Department of Statistics: National Exports Grew by 8.5% During the First Seven Months of 2025.

The Department of Statistics issued its monthly report on External Trade in Jordan, indicating an increase in the national exports in the first seven months of 2025 by 8.5% and the re-exports by 4.1%. Accordingly, the total exports have increased by 8.1% compared to the same period in 2024. This growth coincided with a 5.4% increase in imports, resulting in a 2.7% increase in the trade balance deficit during the first seven months of 2025 compared to the same period in 2024.

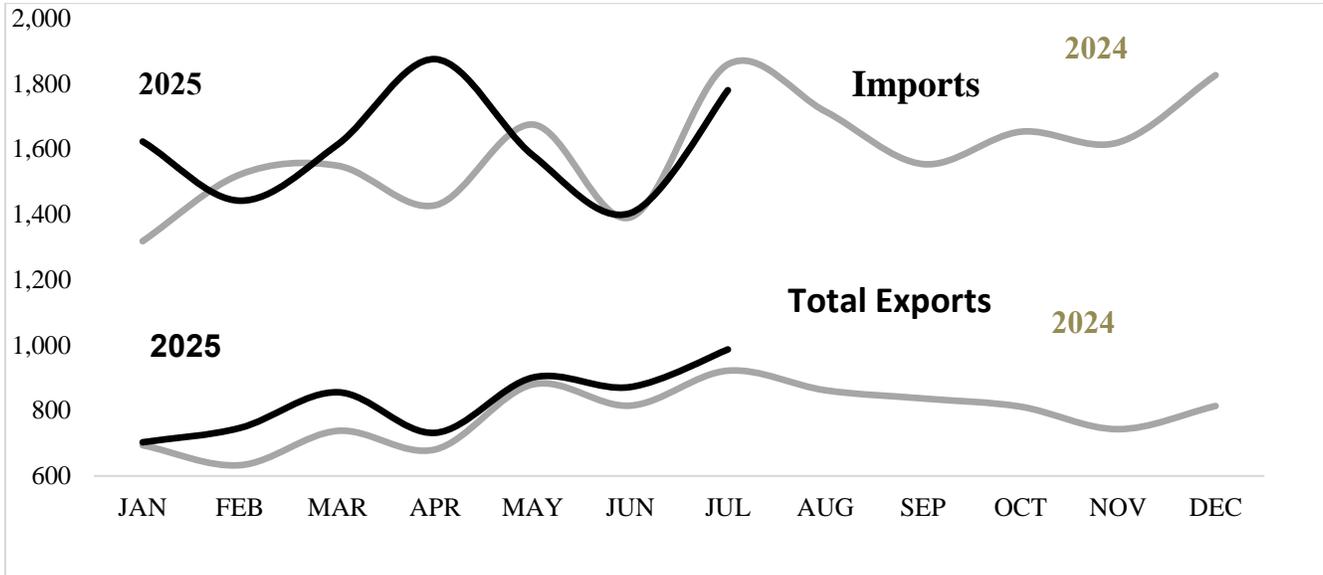

Exports-to-Imports Coverage Ratio

The total exports coverage ratio to imports reached 51% during the first seven months of 2025, compared to 50% for the same period in 2024, indicating an increase by one percentage point, which is the highest coverage level recorded by the Jordanian economy. Meanwhile, the coverage ratio for July 2025 alone has reached 55% compared to 50% in July 2024, indicating an increase by five percentage points.

Economic Figures and Indicators during 1st seven months of 2025

The total exports during this period reached 5,798 million JOD, whereby the national exports constituted 5,268 million JOD and the re-exports 530 million JOD, while the imports reached 11,319 million JOD during the same period. Accordingly, the trade balance deficit (which represents the difference between the value of total exports and the value of imports) has reached (5,521) million JOD in the first seven months of 2025 (i.e., trade balance deficit increased by (145) million JOD) compared to the same period in 2024.

Figure 1: External Trade Monthly Values During the First Seven Months of 2024 and 2025 (Million JOD)

Monthly Performance for July 2025

The value of total exports in July 2025 reached 987 million JOD, including the national exports of 889 million JOD and the re-exports of 98 million JOD, while the imports amounted to 1,780 million JOD, resulting in a trade balance deficit of (793) million JOD during July 2025.

These figures indicate increases in July 2025 compared to the same month in 2024 in the total exports by 7.0%, the national exports by 6.0%, the re-exports by 18.1%, while the imports decreased by (4.2%), resulting in a decrease in the trade balance deficit by (15.4%).

Commodity Composition During the First Seven Months of 2025

The increase in the national exports concentrated in the "Clothes and Related Accessories", "Nitrogenous or Chemical Fertilizers", "Pharmaceutical Products", "Crude Phosphate", and "Crude Potash" industries, which supported the national exports despite the decrease in the export of "Precious Ornaments and Jewelry". As for imports, there were increases in the value of "Precious Ornaments and Jewelry", "Machines and Machinery Tools", and "Electrical Appliances". However, the decline in imports of "Crude Oil and its Products", "Vehicles and Motorcycles", and "Grains" had significantly contributed to limiting the increase in the imports (see Table 1).
