The Hashemite Kingdom of Jordan

Press Release
Department of Statistics: National Exports Grew by 9.1% During the First Eleven Months of 2025.

The Department of Statistics released its monthly report on Jordan's external trade for November 2025, showing a 9.1% rise in the national exports and an 8.8% increase in re-exports during the first eleven months of 2025. Accordingly, the total exports have increased by 9.1% compared to the same period in 2024. This growth coincided with a 9.7% increase in the imports.

Regarding the JOD value of external trade, the total export value during this period reached JOD 9,550 million, with national exports constituting JOD 8,694 million and the re-exports amounting to JOD 856 million, while the imports value reached JOD 18,938 million during the same period. Accordingly, the trade balance deficit (which represents the difference between the value of total exports and the value of imports) had reached (JOD 9,388) million in the first eleven months of 2025; thus, the trade balance deficit increased by 10.3% during the first eleven months of 2025 compared to the same period in 2024. (Figures 1, 2, and 3 illustrate trade values by month.)

Exports-to-Imports Coverage Ratio

The total exports coverage ratio to imports reached 50% during the first eleven months of 2025 compared to 51% for the same period in 2024, indicating a decrease by one percentage point. Meanwhile, the coverage ratio for November 2025 alone had reached 60% compared to 48% in November 2024, indicating an increase by twelve percentage points.

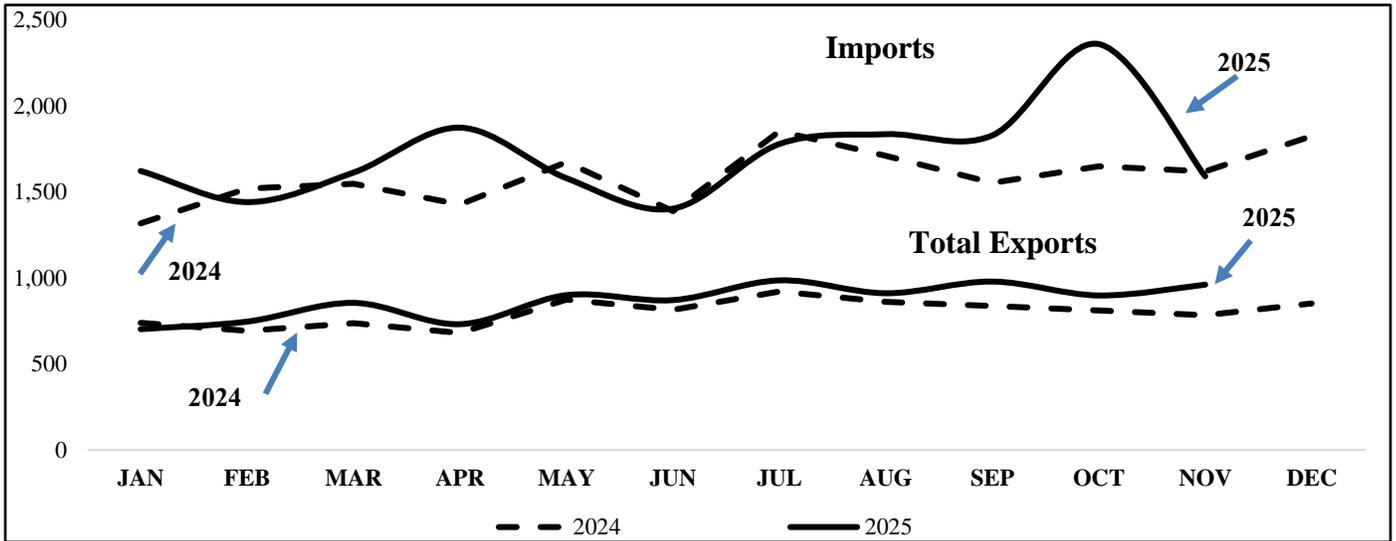

Figure 2 : Monthly Values of Total Exports During the First Eleven Months of 2024 and 2025 (Million JOD)

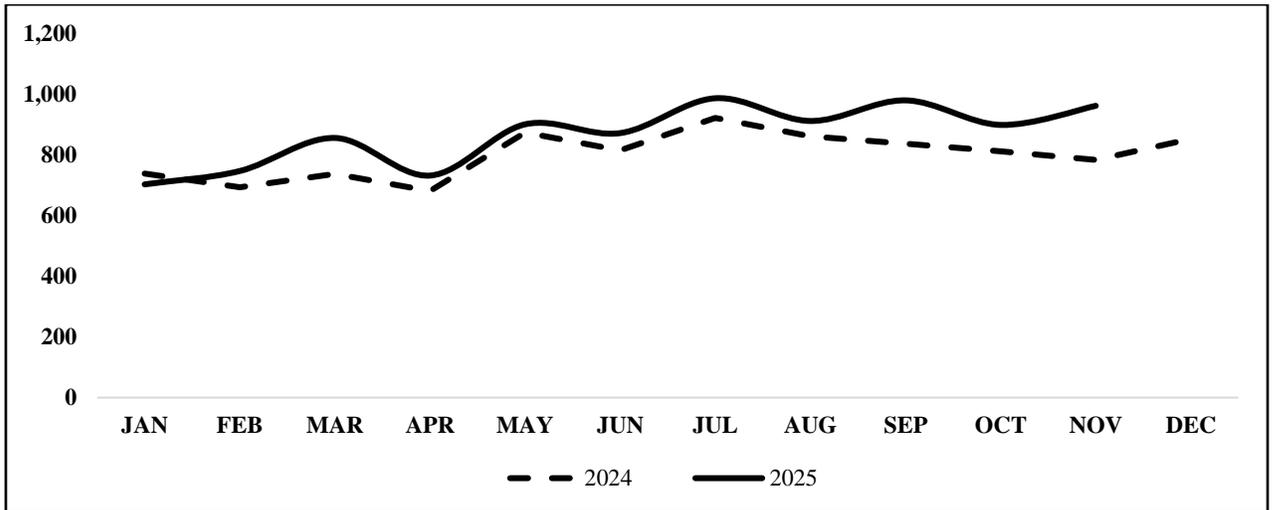

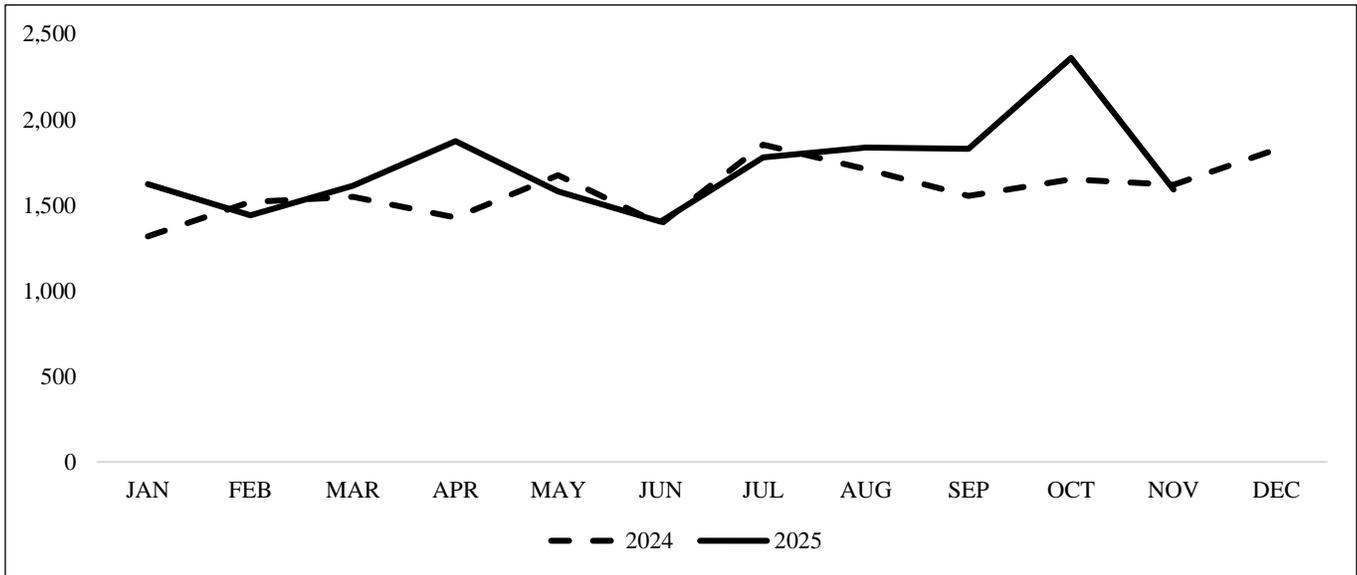

Figure 3: Monthly Values of Imports During the First Eleven Months of 2024 and 2025 (Million JOD)

Monthly Performance for November 2025

In November 2025, the value of total exports reached JOD 962 million, including the national exports of JOD 888 million and the re-exports of JOD 74 million. Meanwhile, the imports amounted to JOD 1,592 million, indicating a decrease of (JOD 769) million compared to October 2025, whereby the imports value in October 2025 had reached JOD 2,361 million.

These figures reveal an increase in the total exports by 22.7% in November 2025 compared to the same month in 2024, national exports by 24.5%, and the re-exports by 4.2%. Meanwhile, the imports decreased by (1.7%), resulting in a decrease in the trade balance deficit by (24.6%).

Commodity Composition During the First Ten Months of 2025

The increase in the national exports concentrated in the "Nitrogenous or Chemical Fertilizers", "Precious Ornaments and Jewelry", "Pharmaceutical Products", "Crude Phosphate", and "Crude Potash" industries, which supported the national exports despite the slight decrease in the export of "Clothes and related Accessories from Knitted Fabrics". As for imports, there were increases in the value of "Vehicles and Motorcycles", "Precious Ornaments and Jewelry", "Machines and Machinery Tools", and "Electrical Machines & Appliances", and "Grains". However, the decline in the imports of "Crude Oil and its Products" had significantly contributed to limiting the increase of the imports (See Table 1).

Table 1: The Most Important Exported and Imported Commodities During the First Eleven Months of 2024 and 2025 - Value in (Million JOD)

National Exports				Imports			
Items	*2024	*2025	Relative Change (%)	Items	*2024	*2025	Relative Change (%)

Trade Partners During the First Eleven Months of 2025

The national exports have increased to countries of the Greater Arab Free Trade Area (GAFTA), including Syria, to which exports doubled by 351% during the period. Additionally, exports have expanded to non-Arab Asian Countries, such as India, and to European Union countries, including Italy. Meanwhile, the national exports decreased slightly to North American Free Trade Agreement (NAFTA) countries, including the United States.

As for imports, there were increases from GAFTA countries, including Saudi Arabia, NAFTA countries, including the USA, Non-Arab Asian countries, such as China, and EU countries, including Germany (see Table 2).
