### GDP growth of 2.3% in the fourth quarter of 2023

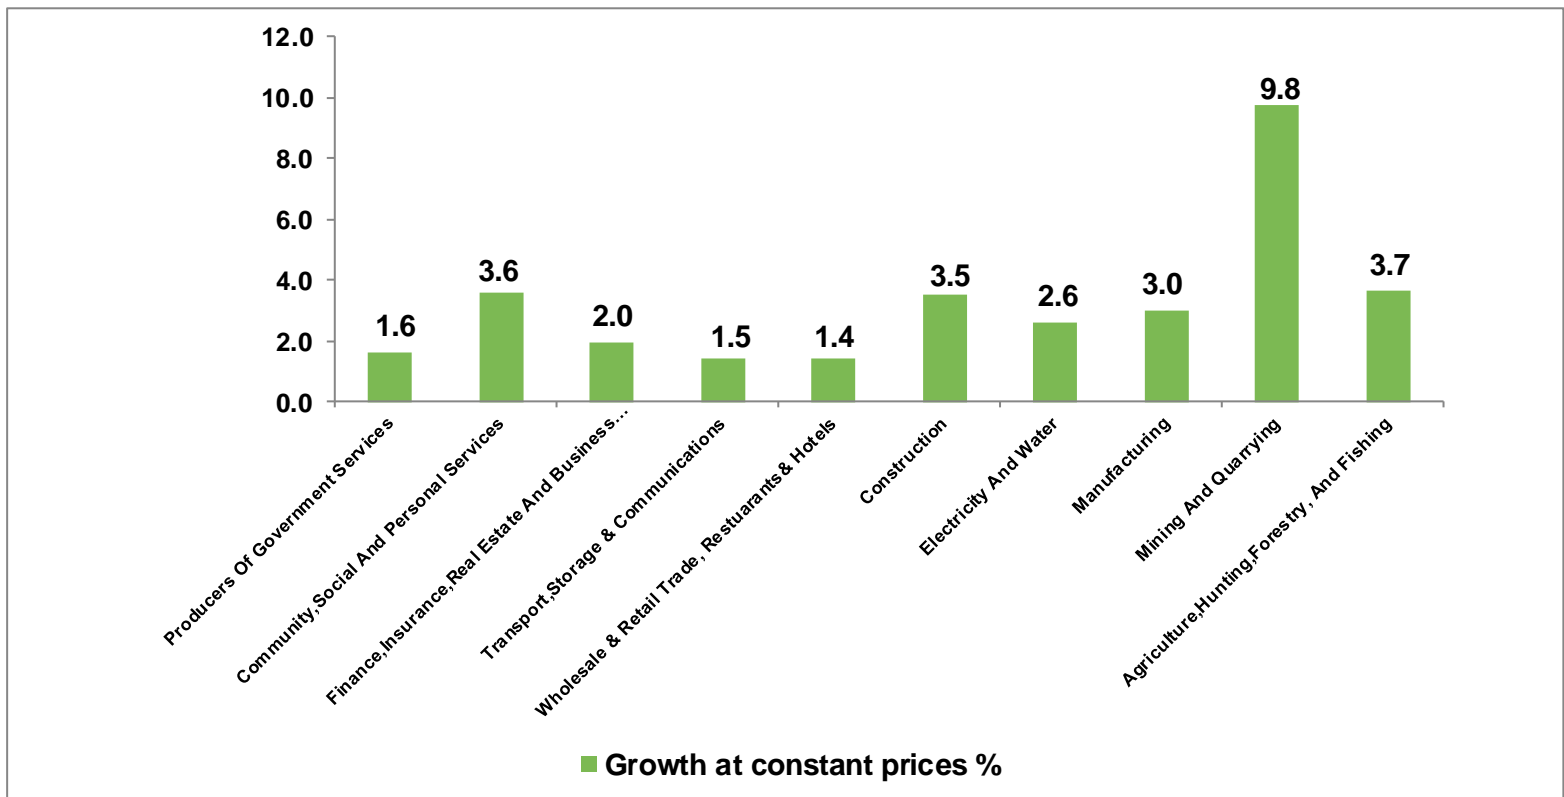

The Department of Statistics issued the results of the quarterly estimates of gross domestic product indicators for the fourth quarter of 2023, where the results showed a growth of 2.3% at constant prices compared to the fourth quarter of 2022 (Figure No. 1). Thus, the growth rate for 2023 compared to 2022 at constant prices will be 2.6% (according to quarterly estimates).

Figure No. (1) - GDP growth (one quarter compared to the same quarter of the previous Year %)

As for sectoral estimates, preliminary estimates showed that the majority of economic sectors achieved growth during the fourth quarter of 2023 compared to the fourth quarter of 2022, as the “quarrying industries sector” achieved the highest growth rate during this period, amounting to 9.8%, contributing by 0.22 percentage points of the achieved growth rate, followed by the “agriculture, hunting, forestry and fishing sector” by 3.7%, contributing by 0.23 percentage points, then the “social and personal services sector” by 3.6%, with a contribution of 0.30 percentage points, followed by the “construction sector”, which grew by a rate of 3.5%, with a contribution of 0.11 percentage points to the achieved growth rate.
