### Press Release

#### **Department of Statistics: Industrial Production Quantities Increased by 1.44% in the First Eleven Months of 2025**

The Department of Statistics released its monthly report on the Industrial Production Index (IPI), which showed a 1.44% increase during the first eleven months of 2025 compared to the same period in 2024. On a monthly basis, the IPI of November 2025 recorded an increase by 1.38% compared to November 2024, and an increase by 0.74% compared to October 2025. Note that the base year has been modified to **(2018=100)** instead of **(2010=100)**.

**Figure (1): Monthly IPI for the years 2024 & 2025**

Accordingly, the IPI for the first eleven months of 2025 reached 88.90 compared to 87.63 for the same period in 2024. On a monthly basis, the IPI of November 2025 reached 88.92 percentage points compared to 87.71 in November 2024. Additionally, the IPI of November 2025 reached 88.92 compared to 88.26 in October 2025.

Comparing the cumulative IPI for the first eleven months of 2025 to the same period in 2024, there were increases in the production quantities of the “*Manufacturing Industries*” sector by 1.34%, with a relative importance of 88.7%, the “*Quarrying Industries*” sector by 0.99% with a relative importance of 5.4%, and the “*Electricity Production*” by 2.91% with a relative importance of 5.9%.

On the monthly change domain, the IPI of November 2025 compared to the same month of 2024 has increased due to a 0.74% increase in the production quantities of the “*Manufacturing Industries*” sector by 0.74%, with a relative importance of 88.7%, and a 16.06% increase in the production quantities of “*Quarrying Industries*” sector, with a relative importance of 5.4%. Meanwhile, the production quantities of the “*Electricity*” sector decreased by (1.33%) with a relative importance of 5.9%.

At the sectoral level and by comparing the IPI of November 2025 with the IPI of October 2025, there were increases in the production quantities of the “*Manufacturing Industries*” sector by 1.04%, with a relative importance of 88.7%, and the production quantities of the “*Quarrying Industries*” sector have increased by 0.62%, with a relative importance of 5.4%. Meanwhile, the production quantities of the “*Electricity*” sector were decreased by (3.50%) with a relative importance of 5.9%.

It is worth mentioning that computing the IPI relies on a selected sample from the *Industrial Establishments Survey*, which collects monthly data from about 300 industrial establishments.
