### **Industrial Production Index Increased by 3.08% in November 2024**

The Department of Statistics issued its monthly report on the Industrial Production Index (IPI) of November 2024, which observed an increase by 3.08% compared to November 2023 and an increase by 0.86% compared to October 2024. On the accumulative level for the first eleven months of 2024, the IPI had increased by 0.81% compared to the same period of 2023, noting that the base year was amended to be (2018=100) instead of (2010=100).

Thus, the IPI of November 2024 had reached 87.91 percentage points against 85.29 in November 2023. The IPI of November 2024 also recorded 87.91 against 87.17 in October 2024. On the accumulative level for the first eleven months of 2024, the IPI reached 87.65 against 86.94 for the same period in 2023.

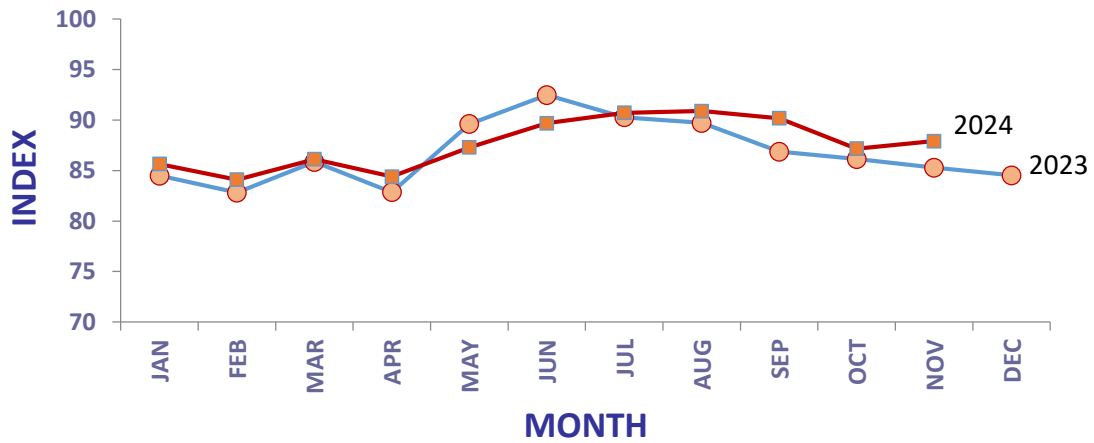

On the domain of the monthly change, the IPI of November 2024 increased compared to the same month of 2023 due to the increases in the production quantities of “Manufacturing Industries” by 2.81% with a relative importance of 88.7%, “Quarrying Industries” by 1.92% with a relative importance of 5.4%, and “Electricity Industry” by 8.33% with a relative importance of 5.9%.

On the industry level and by comparing the IPI of November 2024 with October 2024, there were increases in the production quantities of the “Manufacturing Industries” by 1.52% with a relative importance of 88.7% and the “Electricity Industry” by 1.72% with a relative importance of 5.9%, while there was a decrease in the production quantities of the “Quarrying Industries” by (10.39%) with a relative importance of 5.4%.

Comparing the accumulative IPI for the first eleven months of 2024 with the same period of 2023, there were increases in the production quantities of the “Manufacturing

Industries” by 0.11% with a relative importance of 88.7%, the “Quarrying Industries” by 7.96% with a relative importance of 5.4%, and the “Electricity Industry” by 5.41% with a relative importance of 5.9%.
