

THE HASHEMITE KINGDOM OF JORDAN

**Arrivals and Departures Survey
"For Tourism Purposes"
1998/1999**

January 1999

Preface

The Department of Statistics (DoS) is pleased to publish the results of the Arrivals and Departures Survey (for tourism purposes) which was implemented during February 1998 – January 1999. This survey included the number of arrivals and departures by nationality and nationality group, main purpose of visit, average expenditure, total expenditure and distribution and other detailed data.

The survey data was collected through personal interview for arrivals and departures who met the criterion of residence (resident for arrivals and non-resident for departures) at all borders check points (sea, land and airports). The DoS has used the latest international recommendations in the field of tourism statistics issued by the World Tourism Organization. This includes the preparation of the survey questionnaire and the use of the latest statistical methods for data collection and data processing for the purpose of bringing out the increasing importance of the tourism activity, as well as estimating the tourism income and expenditure (tourism and travel) in the balance of payments. Updating the tourism data is also necessary for meeting the increasing demand on tourism statistics by those institutions interested in market analysis issues, marketing effectiveness, tourism investment and other relevant policies. The data published were at nationality group level for the Arrivals and at the Nationality for the Departure.

The DoS would like to extend its deepest thanks to all those who made this survey a success, particularly the Steering and Technical Committees that supervised the preparation and implementation of the survey in all its stages. Thanks also are due to all concerned official institutions for their fruitful cooperation in providing facilities and services at all entry points. The DoS hopes that the results included in this report would be of great help for all those concerned about this sector such as planners and researchers. The DoS is also pleased to receive any constructive remarks and comments aiming at improving this report in the future.
