## Department of Statistics (DOS): Agricultural Producers Price Index Increased by 2.7% in January 2026

The Department of Statistics (DOS) issued its monthly report on the Agricultural Producers Price Index (APPI), which recorded an increase by 2.7% in January 2026 compared to January 2025 and an increase by 1.2% compared to December 2025.

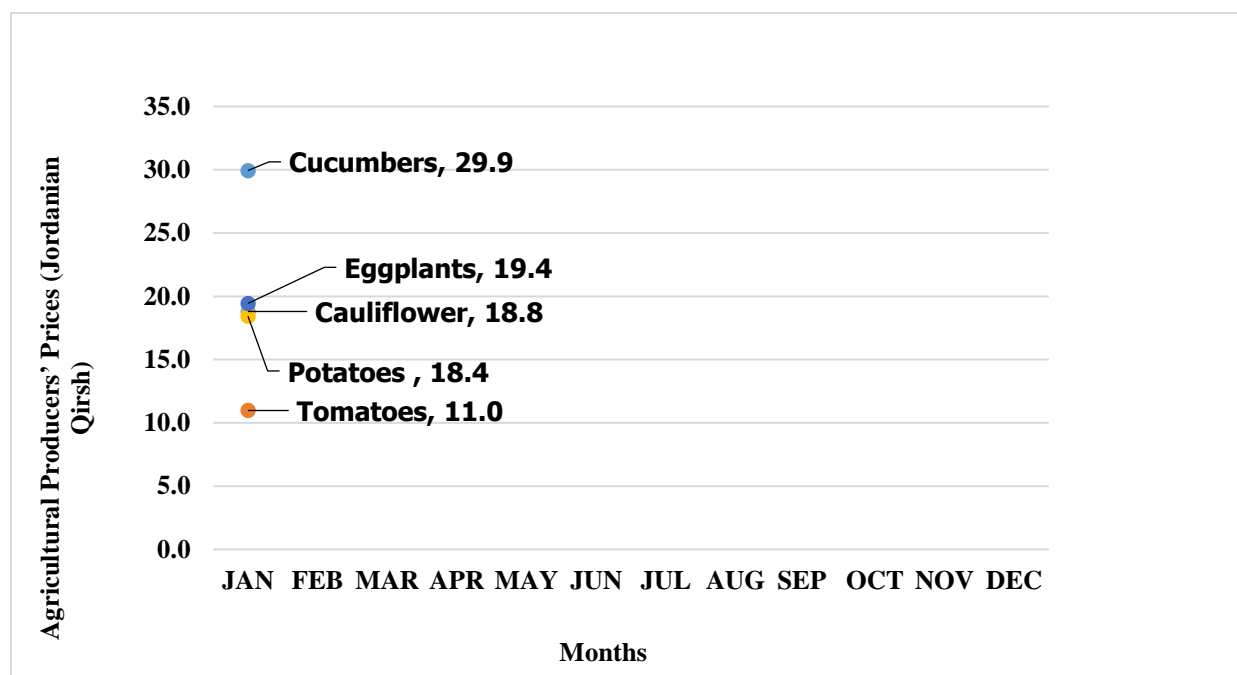

Accordingly, the APPI of January 2026 reached 90.6 against 88.1 in January 2025, while the APPI of December 2025 recorded 89.4.

The increase in the APPI of January 2026 compared to January 2025 is attributed to the growth of the price index of various crops, whose relative importance represented 53.7%, most notably: Lemons by 154.4%, Squash by 61.1%, and Green Onions by 42.6%. In contrast, the price index of various crops declined, whose relative importance represented (46.3%), most notably: White Cabbage by (70.8%), Green Maize by (40.1%), and Potatoes by (35.1%).

Comparing the price index of January 2026 to the price index of December 2025, the prices of various crops increased, whose price index represented 63.2%, most notably: Tomatoes by 194.5%, Cauliflower 43.2%, and Kumquats by 36.3%. Meanwhile, the price index of various crops declined, whose relative importance represented (36.8%), most notably: Red Cabbage by (16.3%), Chili Peppers by (6.4%), and Oranges by (5.7%).

The following graph illustrates the change in the agricultural producers' prices by Jordanian Qirsh for the main crops during 2026.

*Figure 1: Changes in the Prices of Agricultural Producers for Main Crops in 2026*

It is worth mentioning that DOS has revised the methodology of collecting agricultural prices data through a specialized technical committee from DOS and the Ministry of Agriculture. This revision was based on the recommendations of the *Permanent Experts Committee for Agricultural Statistics*, which is part of the National Agricultural Strategy. To improve data quality, agricultural price data for all crops have been sourced from the central markets on a monthly basis. The year 2016 was adopted as the base year (2016=100), and the *Laspeyres Equation* was used to compute the index.

*Table 1: Prices of Agricultural Producers for January 2025 Compared to January 2026 (Qirsh /Kg)*

<b>Crop</b>	<b>January 2025</b>	<b>January 2026</b>	<b>Increase / Decrease Percentage (%)</b>
Lemons	21	55	154.4
Papayas	42	95	127.8
Squash	37	59	61.1
Green Onions	53	76	42.6
Mushrooms	282	396	40.7
Cauliflower	14	19	37.6
Tomatoes	8	11	31.0
Radish	11	15	30.9
Cucumbers	26	30	16.5
Bitter oranges	32	37	15.4
Oranges Cumulative	50	57	14.2
White Cabbage	27	8	-70.8
Tangerines	69	36	-47.4
Green Maize	42	25	-40.1
Potatoes	28	18	-35.1
String Beans Green	87	57	-34.5
Thyme	176	133	-24.0
Dates	245	188	-23.4
Dry Onion	21	17	-20.8
Chilli Pepper (Cumulative)	38.6	30.8	-20.2

The following graph illustrates the change in the prices of the main crops for agricultural producers in December 2025 Compared to January 2026 (Qirsh/ KG)
